# reinteractive

November 1, 2017

*Letter of Recommendation – Dave Cruikshank*

To Whom It May Concern:

Dave has worked with us at reinteractive from late 2010 until mid 2017. During this time, he was an HTML / CSS / JS front end designer helping us build many customer projects primarily on top of the Ruby on Rails application framework.

reinteractive is one of Australia's premiere Ruby on Rails focused development agencies and we develop Ruby on Rails based web applications for all sorts of customers from sole traders to large enterprise organisations.

I found Dave to be a hard-working, diligent team member. He backed up the company when extra work was needed and was flexible in what was being demanded of him from customers.

He has a great ability to listen and can communicate issues clearly, always willing to work them out and get to a resolution instead of sitting back and holding it in. This is a valuable trait for any team member, and especially one that has to interpret sometimes vague design requirements into a concrete implementation.

Over the 7 years, Dave worked on dozens of projects for dozens of clients, this has given him a very broad experience base that would be exceptionally valuable to any organisation looking to hire a front-end designer.

I am happy to recommend Dave as a valuable team member. If you have any questions you would like to ask, please do not hesitate to email me at mikel@reinteractive.net or call me at the office.

Best

Mikel Lindsaar
